

Напорный фильтр WKDF AFE QE с фланцем

Up to 500L/min

Up to 315bar

WKDF AFE QE

Pressure Filter

1. TECHNICAL SPECIFICATIONS

1.1 FILTER HOUSING

Construction

The filter housings are designed in accordance with international regulations. They consist of a filter head and a screw-in filter bowl.

Standard equipment:

- mounting holes in the filter head
- two-piece bowl for size 990 and above (optional for size 660 and above)
- drain screw with pressure relief (standard for size 330 and above)

1.2 FILTER ELEMENTS

WK-Hydraulic filter elements are validated and their quality is constantly monitored according to the following standards:

- ISO 2941
- ISO 2942
- ISO 2943
- ISO 3724
- ISO 3968
- ISO 11170
- ISO 16889

Filter elements are available with the following pressure stability values:

Glass fiber (ON):	20 bar
Glass fiber (BH4HC):	210 bar
Wire mesh (W/H):	20 bar
Stainless steel fibre (V):	210 bar

1.3 FILTER SPECIFICATIONS

Nominal pressure	WK DF AFE QE : 315 bar
Fatigue strength	10 ⁶ cycles (WK DF AFE QE) from 0 to nominal pressure
Temperature range	-10 °C to +100 °C (-30 °C to -10 °C: p _{max} = 0.5 x nom. press.)
Material of filter head	EN-GJS-400-15 (WK DF AFE QE)
Material of filter bowl	Steel
Type of clogging indicator	VD (differential pressure measurement up to 420 bar operating pressure)
Pressure setting of the clogging indicator	5 bar (others on request)
Cracking pressure of bypass (optional)	6 bar

Symbol for hydraulic systems

VA = clogging indicator

1.4 SEALS

NBR (=Perbunan)

1.5 INSTALLATION

Pressure filter for flange mounting

1.6 SPECIAL MODELS AND ACCESSORIES

- Bypass valve built into the head, separate from the main flow
- Seals in FPM, EPDM
- Test and approval certificates

1.7 SPARE PARTS

See Original Spare Parts List

WKDF 30-280 QE:

The exit is above the entrance

WKDF 330-1320 QE:

The exit is above the entrance
